Warning: Please check your state and local laws before installing the 24" SMD add-on grille tube. Every state has different policies and procedures for aftermarket accessories. LEDGlow is not responsible for any fines that you may receive while using this product. This product is for off road use only.

Warning: LEDGlow recommends this kit is installed by a licensed professional. Any damage to this kit that is the result of improper installation will void all warranties.

This 24" SMD add-on grille tube is only compatible if you have an existing LEDGlow Single Color or Million Color Wireless Underbody system. This 24" SMD tube is to be mounted in the grille of your vehicle. Be sure that the tube and wiring is at least 8 inches away from any direct heat source or moving parts.

Add-On Tube Kit Includes:

- (1) 24" SMD Grille Tube
- (1) 7 Port Underbody Tube Distributor Cable
- (2) 15 Degree Angled Tube Mounting Brackets
- (2) Rubber Port Plugs
- Large Screws

Please read the following instructions thoroughly before installing your add-on grille tube.

1. Disconnect the negative side of the vehicle's battery.
2. **Optional:** Raise and support vehicle if needed.
3. Disconnect the current underbody tube distributor cable from the control box. Also, unplug all of the underbody tubes from the distributor cable. Plug in the new 7 port underbody tube distributor cable into the control box.
4. Plug the add-on grille tube into port "B" on the 7 port underbody tube distributor cable. Reconnect the negative terminal on the battery and power the system ON to ensure the function of the grille tube. Once you have determined that the tube is functioning properly, power the kit OFF and disconnect the negative terminal of the battery again to finish the installation.
5. Arrange the grille tube the way you plan to install it on the vehicle's grille. Be sure to route the wiring for the tube in a location free of any moving parts or direct heat source and secure the wiring using zip ties. **Note: DO NOT SHORTEN OR CUT ANY OF THE GRILLE TUBE POWER WIRES. This could destroy the kit and will void all warranties.**
6. Use the included mounting brackets and screws to secure the tube to the vehicle's grille. We recommend adding a zip tie around each mounting bracket for added security.
7. Lower the vehicle if it was raised.
8. Reconnect the negative terminal to the vehicle's battery and power the system ON to ensure the system is working properly.
