- (4) Screws
- (1) Magnetic Power Switch
- (1) Magnet

Magnetic Switch Installation:

1. Prior to installation, clean the proposed mounting areas with soap and water, then wipe down with alcohol and allow time to dry.
2. Once you have adequately cleaned your mounting locations, mock up your magnetic power switch and magnet, ensuring these components can be mounted within 5mm of each other and do not interfere with the operation of your tailgate.
3. After determining the exact locations where you want to mount the magnetic switch and magnet, you can mount these using the supplied screws.
4. Connect one of the cables from the magnetic power switch wiring to a positive 12-volt source. You can connect the wire to the positive terminal of the battery or any 12-volt source in the fuse box using LEDGlow's Expandable Circuit, which is sold separately from your kit.
 - **Note:** Be sure to install a 5 amp inline fuse 5-8 inches from the power supply.
5. Connect the remaining wire to both power wires with the white stripe, coming from the light strands of your truck bed lighting kit.
6. Once finished, be sure to test your magnetic power switch for full functionality.
