4pc Million Color Golf Cart Add-On Interior Lighting Kit

⚠WARNING: Please check your state and local laws before installing this LED lighting kit. Every state has different policies and procedures in place regarding aftermarket vehicle accessories. LEDGlow is not responsible for any fines that you may receive while using this lighting kit. This kit is for off-road use only.

This kit is recommended to be installed by a licensed professional. The improper installation of this kit voids all warranties.

PLEASE READ THE FOLLOWING INSTRUCTIONS THOROUGHLY BEFORE INSTALLING AND OPERATING THIS LED GOLF CART KIT.

Golf Cart Kit Includes:

- (4) 8" Flexible Interior Tubes
- Self-Tapping Screws
- Zip-Ties

1. You must follow the instructions or have already installed your 4pc Million Color Golf Cart Base Kit in-order to install this add-on kit.
2. Temporarily power the kit with any 12 volt source to ensure proper functionality of this kit before installation. Connect the red wire to the positive (+) terminal and the black wire to any good ground source or negative (-) terminal.
3. Arrange the tubes out on the ground the way you plan on installing them and connect them to the junction box. After powering the kit and determining the kit is functioning properly, remove the kit from power.
4. Disconnect the negative side of the golf cart's battery.

➤ **OPTIONAL STEP:** Raise and support the golf cart if necessary.

5. Clean the proposed mounting surfaces with an alcohol prep pad. The mounting surface should be between 45 and 85 degrees Fahrenheit to achieve the strongest bonding results from the double-sided adhesive tape.

⚠WARNING: The surface area must be free of all oils, moisture, dirt, and wax for the supplied adhesive tape to bond and adhere to the installation surface properly.

⚙ **TECH TIP:** To achieve the strongest bond between the tape of the lighting strips and the golf cart, you can use Adhesion Promoter, which is sold separately from your kit at www.LEDGlow.com. Once the lighting strips are in place make sure that the lighting strips are permanently secured using screws and/or wire ties.

6. Mount the 8" lighting strips and secure with the wires facing either side of the cart. These lighting strips are generally mounted in the glove box area, under the dashboard under the backrest of the seat or in the cargo area (if applicable).
7. Starting with the rear tube, run the wires to the junction box. Make sure to secure the wires tightly when going around any suspension parts and exhaust using the included zip-ties. Wires must be at least 10" from the exhaust, and away from any suspension parts. If a wire is pinched, the kit may malfunction and could void the warranty. Run the underbody wires along the golf cart frame as well as the wheel well and interior wires and make sure everything is tightly secured. Ensure that all connections are secure.
8. Use the supplied rubber plugs to block off any ports on the junction box that are not being used.
