Wireless Remote Reprogramming for Car & Truck Underbody Lighting Kits

These remote styles are compatible with several different control boxes. Instructions on pairing one of these remotes to your specific control box can be found below.

Single & Million Color Underbody Controller & Million Color Wheel Well Controller

With 12V power connected to the control box and the control box powered off, press and hold the mode button on the remote and the mode button on your control box simultaneously for 7 seconds. After, test the operation of your kit with the remote.

Million Color Smartphone Underbody Controller

If your control box is connected to 12V power and ground, disconnect and reconnect power to the control box. The LED light indicator on your control box should be an amber color. Then, press and hold the mode button on the wireless remote for 7 seconds. After, test the operation of your kit with the remote.

Advanced 3 Million Underbody Controller

With 12V power connected to the control box and the control box powered off, press and hold the square button with a square underneath of it on the control box as well as the mode button on the wireless remote until the LCD display shows "0000." After, test the operation of your kit with the remote.

Single Color Wireless Wheel Well Controller

With 12V power connected to the control box and the control box powered off, press and hold the button on the control box as well as the mode button on your wireless remote for 7 seconds. After, test the operation of your kit with the remote.
